## 6. Accidental Release Measures

Isolate the hazard area and keep unnecessary and unprotected personnel from entering.  
Removal of ignition sources. Use non-sparking tools and equipment.  
Wear self-contained positive pressure breathing apparatus and anti-static clothes.  
Soak up the leakage with inert absorbent material and recover into the suitable, closed containers for disposal.  
Flush the contaminated area with plenty water. Avoid release to environment.

## 7. Handling and Storage Measures

Handling	Keep container tightly closed. Do NOT closed to heat or fire.
Storage	Stored in a cool, dry, ventilated area.

## 8. Exposure Controls / Personal Protection

Occupational exposure limits	Not established.
Engineering controls	Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower. In general, dilution ventilation is a satisfactory health hazard control for this substance. However, if conditions of use create discomfort to the worker, a local exhaust system should be considered.
Inhalation protection	If the exposure level is high and engineering controls are not feasible, a half facepiece or full-face piece air-purifying respirator may be worn. For emergencies or instances where the exposure levels are not known, use a full-facepiece positive-pressure, air-supplied respirator. WARNING: Air-purifying respirators do not protect workers in oxygen-deficient atmospheres.
Eye protection	Use safety goggles or face protections to protect against possible eye exposure.
Skin protection	Wear protective gloves and clean body-covering clothing.
Other protection	No information.
